

SALE OF ADULTERATED OR EXPORT BOUND MOTOR FUELS IN THE LOCAL MARKET

The Energy Regulatory Commission is mandated under section 95 of the Energy Act 2006 to monitor petroleum products offered for sale in the local market with the aim of preventing motor fuel adulteration or dumping of export bound fuels. In this regard, the Commission undertakes a program of continuous monitoring of the quality of petroleum motor fuels being sold throughout the country.

During the months of May, June, July and August 2015, a total of 4,733 tests were carried out in 808 petroleum outlets. From the tests carried out, 99.5% were found to be compliant. However, fifty-six (56) tests from thirty eight (38) sites were non-compliant. Pursuant to Regulation 15 of the Energy (Retail Facility Construction and Licensing) Regulations 2013, the non-compliant stations and their particular offenses are listed here under:
