

Statistical Release

Gross Domestic Product and Balance of Payments

Third Quarter 2015

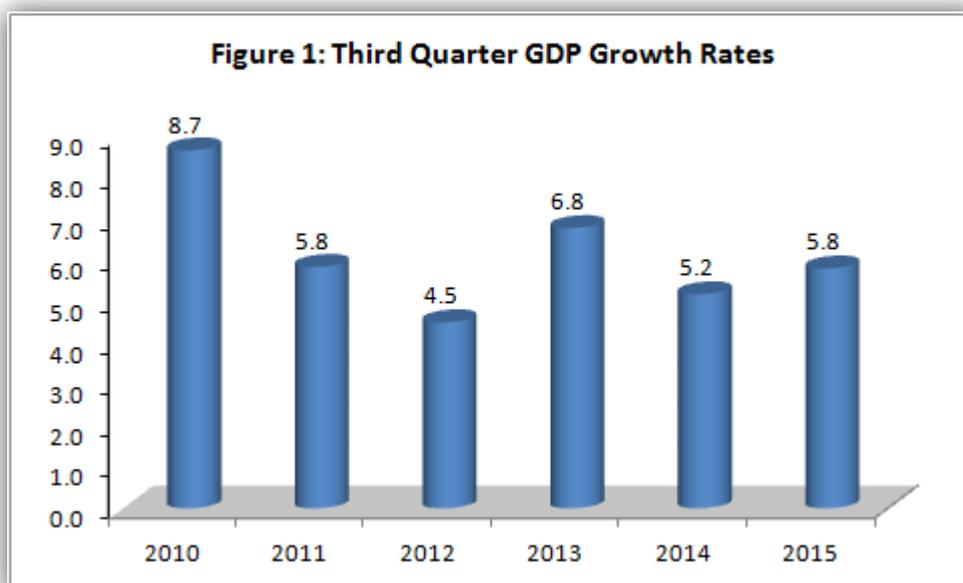

December 2015

1.0 Overview of the Economic Performance

Provisional estimates of Gross Domestic Product (GDP) show that the country's economy expanded by 5.8 per cent during the third quarter of 2015 compared to 5.2 per cent recorded during a similar quarter of 2014 as shown in Figure 1. The growth was mainly supported by strong expansions in Agriculture; Construction; Financial and Insurance; Wholesale and Retail Trade; and Transport and Storage. Activities of the Construction industry recorded the fastest growth of 14.1 per cent followed by Mining and Quarrying, Electricity Supply and Financial and Insurance with growths of 12.5 per cent, 11.0 per cent and 10.1 per cent, respectively. Accommodation and Food Services (Hotels and Restaurants) continued on the decline that started last year.

During the quarter, most of the macroeconomic indicators remained relatively stable. Inflation eased to an average of 6.14 per cent from 7.54 per cent recorded in the corresponding quarter of 2014 mainly due to decrease in transportation costs in line with the global fall of oil prices. Globally, Murban ADNOC crude oil prices halved to average at US\$ 51.05 per barrel during the quarter under review compared to US\$ 103.9 in the same quarter of 2014. Domestically, the retail prices for light diesel declined by 20.0 per cent over the same period.

In the money market, the Kenyan Shilling strengthened against the Euro, Yen, South African Rand, Ugandan Shilling and the Tanzanian Shilling but weakened against the US Dollar and the Sterling Pound during the third quarter of 2015 compared to a similar period in 2014. Despite an upward revision of the Central Bank Rate (CBR), weighted interest rates on commercial banks loans and advances declined by 0.61 percentage points to average at 15.79 per cent during the quarter under review compared to 16.40 per cent in the same quarter of 2014. The CBR was adjusted from 8.50 per cent, that prevailed in the first half of 2015, to 10.0 per cent in June and later to 11.5 per cent in July 2015. The volume of stocks traded at the Nairobi Securities Exchange (NSE) declined significantly to a monthly average of 4,251 shares compared to 5,100 shares during a similar quarter of 2014. During the review period, the value of total exports increased by 23.2 per cent while the import bill declined by 9.7 per cent, resulting to narrowing of the current account deficit by KSh 86.5 billion compared to the same quarter in 2014.

2.0 Sectoral Analysis

Agriculture and Forestry

During the third quarter 2015, the sector is estimated to have expanded by 7.1 per cent compared to 6.8 per cent recorded in similar quarter of 2014. The growth was supported by increase in the production of most major crops and the dairy sub-sector against a background of improved weather conditions. However, external demand for horticultural produce was negatively impacted on by the strengthening of the Kenyan Shilling against the Euro during the review period. Exports of cut flowers and fruits increased during the quarter under review while exports of fruits declined.

Production of tea, coffee and sugarcane increased during the review quarter. Tea exports increased to 95.8 thousand metric tonnes from 90.7 thousand metric tonnes in the corresponding quarter of 2014. The auction prices of tea increased by 45.5 per cent during the review period, to average at US\$ 3.2 per kilogram. Over the same period, coffee auction sales recorded a marginal increase to stand at 8,015 metric tonnes compared to 7,930 metric tonnes. Cane deliveries increased by 3.8 per cent during the third quarter of 2015 to an estimated 1,738 metric tonnes from a decline of 7.2 per cent recorded in a similar quarter in 2014.

The dairy sub-sector also reported improved performance during the review period supported by improved rains. Milk intake in the formal sector was estimated at 137 million litres in the third quarter of 2015 compared to 124 million litres during the same quarter last year.

Manufacturing

Activities of the manufacturing sector benefited from lower oil and electricity prices during the review period. The sector was also boosted by a decline in the interest rates though they remained relatively high. Commercial bank credit to the manufacturing sector grew by 19.3 per cent from KSh 235.1 billion by end September 2014 to KSh 280.4 billion by end September 2015. The industry is estimated to have expanded by 2.8 per cent during the third quarter 2015 compared to a growth of 1.5 per cent in the same period of 2014.

Transport

During the quarter under review, the transport sector grew by 8.7 per cent compared to 7.8 per cent growth recorded in the same quarter of 2014. The accelerated growth was attributed to increased demand for freight transport and a fall in oil prices. Consequently, the consumption of light diesel, a key indicator of the sector, increased from 449.3 thousand tonnes in the third quarter of 2014 to 556.6 thousand tonnes during the review period.

Accommodation and Restaurants

Activities of Accommodation and Restaurants sector contracted by 2.3 per cent during the third quarter of 2015. This was, however, a slower decline compared to that of 20.5 per cent during the same quarter of 2014. The suppressed performance of the sector was attributed to both internal and external factors among them the lagged effects of insecurity and negative travel advisories by some key tourist source countries. Bed occupancy, which is a key performance indicator of the sector, remained on a downward trend though at decelerated rate.

Construction

The sector is estimated to have expanded by 14.1 per cent during the review period compared to a growth of 8.8 per cent in the same period of 2014. The accelerated growth was mirrored in the increased credit advanced to the sector and cement consumption. Credit advanced to the sector by commercial banks increased from Ksh78,804 million in the third quarter of

2014 to Ksh 100,827 million in 2015. Cement consumption increased by 10.7 per cent from 1,304,257 metric tonnes in the third quarter of 2014 to 1,443,544 metric tonnes in the same period of 2015.

Electricity Supply

The sector recorded an accelerated growth of 11.0 per cent during the period under review compared to a growth of 7.2 per cent in same quarter of 2014. The sector's growth was mainly attributed to increased share of both geothermal and hydro-electric power generations coupled with a significant reduction in generation of the more expensive thermal electric power. The enhanced production was due to improved long rains that led to the increased hydro-electric power generation and additional geothermal capacity of 280 megawatts in the fourth quarter of 2014.

During the third quarter of 2015, production of geothermal electricity posted the highest expansion of 40.4 per cent followed by hydro-electric power generation which expanded by 12.7 per cent compared to the same quarter of 2014. On the other hand, production of thermal electricity contracted by 44.7 per cent from 213.2 MWh in third quarter of 2014 to 117.8 MWh during the review quarter.

Information and Communication

The sector recorded a slowed growth of 8.9 per cent compared to a growth of 16.1 per cent in a similar quarter in 2014. The growth was mainly supported by voice traffic and internet services. Local outgoing traffic increased by 35.1 per cent to 10,877 million minutes during the third quarter of 2015 compared to 8,049 million minutes in the same period of 2014. Total incoming local voice traffic grew by 33.0 per cent compared to the same quarter in 2014.

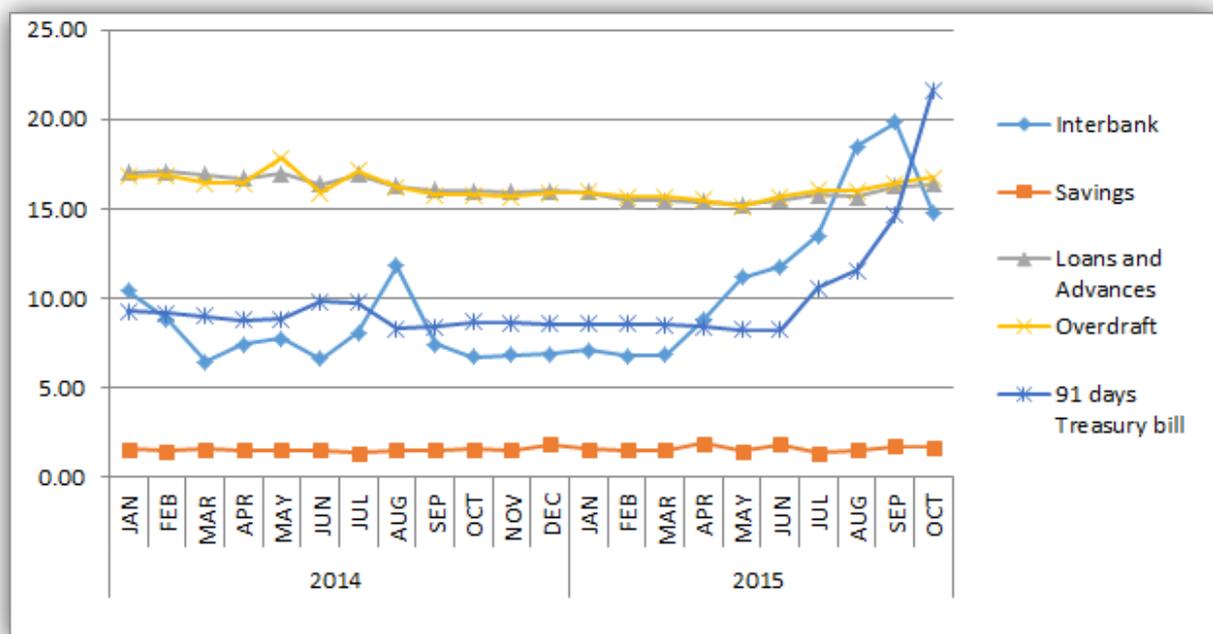

Financial Intermediation

The sector recorded an improved growth of 10.1 per cent during the period under review compared to 7.1 per cent growth in the same quarter of 2014. Overall domestic credit increased by 23.3 per cent to KSh 2,785.3 billion. As at end of September 2015, credit to private sector stood at KSh 2,206.3 billion representing a growth of 20.9 per cent compared to the same point in 2014. The net foreign asset of the banking system declined by 12.8 per

cent to KSh 436.5 billion in the review period compared to a growth of 19.8 per cent over a similar period in 2014.

Extended broad money supply M3 expanded by 13.5 per cent in September 2015 compared to an expansion of 19.4 per cent in September 2014. Average interest rate on 91 day-Treasury bill rose significantly from 8.38 per cent in September 2014 to 14.0 per cent in September 2015. Commercial banks' lending rates remained fairly stable at 16.27 in September 2015 compared to 16.04 in similar period in 2014. Movements in interest rates and 91 days Treasury bill are depicted in Figure 2. The NSE 20 share index declined from 5,256 points in September 2014 to 4,173 points in September 2015.

Figure 2: Monthly Movements in Interest Rates and 91 Days Treasury Bill, January 2014 – September 2015

3.0 Balance of Payments

Balance of payments and international merchandise trade statistics are presented in Tables 4 and Table 5, respectively. During the third quarter of 2015, the overall balance of payments position recorded a deficit of KSh 51,356 compare to a deficit of KSh 76,804 million in the third quarter of 2014. The current account balance narrowed by 43.5 per cent from a deficit of KSh 198,864 million in the third quarter of 2014 to a deficit of KSh 112,377 million in the third quarter of 2015. This was mainly on account of increase in the value of exports against a decline in the import bill. International trade in services registered a surplus of KSh 20,468 million in the quarter under review up from a surplus of KSh 14,964 million recorded in a similar period of 2014. Net financial flows excluding reserves decreased by 26.5 per cent from a surplus of KSh 214,464 million in the third quarter of 2014 to a surplus of KSh 157,615 million.

International merchandise trade balance reduced by 23.5 per cent from a deficit KSh 319,159 million in the third quarter of 2014 to a deficit of KSh 244,171 million in the same quarter of 2015. The value of total exports increased relatively faster by 23.2 per cent compared to the import bill which decreased by 9.7 per cent in the review period. The increase in the value of exports was mainly due to increases in the value of exports of food and live animals; manufactured goods, and crude materials.
