

Statistical Release

Gross Domestic Product Third Quarter 2012

1.0 Economic performance

Kenya's economy expanded by 4.7 per cent in the third quarter of 2012 compared 4.0 per cent growth recorded in the same quarter of 2011 (*see Figure 1 and Tables 1 and 2 for details*). The expansion was more robust in comparison to the preceding quarters of 2012 primarily due to strong performances of the Agriculture and forestry, Fishing, Manufacturing, Transport and communication and a turnaround in the performance of the Electricity industry. On the other hand, Construction, Hotels and restaurants, and Mining and quarrying experienced decelerated growths over the same period. Wholesale and retail trade registered a strong growth despite being a deceleration compared to the corresponding quarter of 2011. Seasonally adjusted Gross Domestic Product, which compares consecutive quarters, expanded by 2.2 per cent in the third quarter of 2012, which was significantly better than the 0.5 per cent recorded in the second quarter of 2012.

The period under review was characterized by low inflation rate, high interest rates and stable exchange rate of the shilling against major world and regional currencies. Inflation averaged at 6.4 per cent during the review period from a high 16.5 per cent experienced during the third quarter of 2011. The ease in the inflationary pressures was mainly on account of lower food and fuel prices. During the review period the exchange rate averaged at KSh 84.60, KSh 106.3 and KSh 108.37 against the US Dollar, Euro and 100 Japanese Yen, respectively. Regionally, the Kenya Shilling exchanged at Tanzania Shilling 18.63 and Uganda Shilling 29.62 while the South African Rand averaged at KSh 10.2. During the third quarter of 2011, the exchanges rates were KSh 94.6, KSh 133.5 and KSh122.9 against the US Dollar, Euro and 100 Japanese Yen, respectively.

High interest rates that prevailed during the quarter under review were on account of the Central Bank's sustenance of a tight monetary policy stance. Expansion in broad money supply slowed to 13.6 per cent during the review period compared to a growth of 18.0 per cent during a similar period of 2011. Weighted interest rates on commercial banks loans and advances rose significantly from an average of 14.41 per cent during the third quarter of 2011 to 20.0 per cent in corresponding period of 2012.

Figure 1: Third quarter growth rates

2.0 Sectoral analysis

2.1 Agriculture and Forestry

Agriculture sector started the year with poor prospects after a number of parts of the country suffered severe frost during the first quarter which negatively impacted on production of tea and other vulnerable crops, while the delay in the onset of long rains led to suppressed agricultural activities. Consequently, the sector only managed a moderate growth of around 2.0 per cent during the first half of 2012. During the third quarter of 2012, however, the sector's performance improved substantially to 6.9 per cent compared to a paltry growth of 0.2 in the same quarter of 2011.

The remarkable growth was largely supported by improved and well spread rains during the second and third quarters of the year. Negative effect of the maize disease, mainly experienced in parts of the South Rift, were more than offset by the good rains in most parts of the country. Consequently, production of key crops including maize, beans, sugar cane and fruits increased significantly. However, production of cut flowers and vegetables declined during the review period. Over the same period, milk intake to the formal milk sector also declined.

2.2 Manufacturing

During the third quarter of 2012, the sector is estimated to have expanded by 4.8 per cent compared to a growth 2.3 per cent during the same quarter of 2011. The growth in the sector was largely supported by strong expansion in the manufacture of foods mainly buoyed by a rebound in processing of sugar which expanded by 48.7 per cent during the third quarter of 2012 compared to a contraction of 38.2 per cent in a similar quarter of 2011. Other food products whose processing increased significantly include beer, wheat flour and maize meal which grew by 17.1, 16.3 and 9.3 per cent, respectively. However, soft drinks and dairy products declined considerably by 10.9 and 10.4 per cent, respectively. Manufacture of motor vehicle tyres, laundry and toilet soaps recorded the highest growths in the non-food category over the same period.

2.3 Electricity and Water

Electricity and water supply recorded 13.7 per cent growth in the third quarter of 2012 compared to a contraction of 11.1 per cent over a similar period in 2011. The turnaround was primarily due to high level of rainfall experienced in the water catchment regions for electricity generation. Hydro electricity generation expanded dramatically by 39.0 per cent during the third quarter 2012 compared to the corresponding quarter of 2011. However, generation of power through geo-thermal and thermal declined by 2.3 and 25.2 per cent, respectively. Consequently, contribution to the Gross Domestic Product of the resulting production mix of electricity was much higher due to reduced thermal generation which requires more expensive intermediate inputs compared to hydro power generation. Electricity production increased to 511.3 million KWh during quarter under review compared to 489.9 million KWh in the same period of 2011.

2.4 Construction

The construction industry is estimated to have expanded by 0.6 per cent during the third quarter of 2012 compared to a growth of 3.6 per cent in a similar period of 2011. The considerable slowdown in the activities of this sector was mirrored in the production and consumption of cement whose growths slowed to 0.6 per cent and 1.5 per cent during the third quarter compared to expansions of 8.9 and 7.7 per cent, respectively over a similar period in 2011. The slowdown in the activities of the construction sector is attributable to the prevailing high interest rates.

2.5 Hotels and Restaurants

The sector's growth slowed to 1.1 per cent during the third quarter of 2012 from 2.1 per cent in the same quarter of 2011. This slowdown was primarily on account of terrorism threats posed by the political instability in Somalia and a decline in the economic fortunes of major tourist sources like the USA and European countries. As a consequence, tourist arrivals through Jomo Kenyatta and Moi international airports declined from 383,110 visitors in the third quarter of 2011 to 342,135 visitors during the third quarter of 2012.

2.6 Transport and communication

The sector is estimated to have grown by 5.2 per cent during the third quarter 2012 compared to a growth of 3.9 per cent in the same period of 2011. The growth was mainly supported by strong expansion in the communication sub-sector which accounted for 54.5 per cent of the total growth in the industry. The sub-sector expanded by 5.9 per cent during the reference period, while land transport and storage activities grew by 4.5 per cent in the same period.

Consumption of light diesel and jet fuel, which reflect the activities of commercial transport, recorded mixed performances. Consumption of light diesel increased by 5.0 per cent in the third quarter of 2012 compared to the same quarter of 2011 while that of jet fuel decreased by 2.1 per cent over the same period. Port activities expanded, as reflected in the increased volume of cargo handled, despite a contraction of 24.1 per cent in exports tonnage during the review period. Import tonnage increased by 11.4 per cent thereby offsetting the impact of the decline in export tonnage to result in a growth of 6.1 per cent of volume of cargo handled at the port during the third quarter of 2012 compared to the same quarter of 2011.

2.7 Financial Intermediation

The sector overcame the bottlenecks of high interest rates to attain one of the most impressive growths during third quarter of 2012. The financial intermediation sector grew by 6.8 per cent during the reference period which was slightly lower than the 7.6 per cent the sector reached in the third quarter of 2011.

Figure 2 depicts the trends of the principal interest rates from the first quarter of 2007 to the third quarter of 2012. All the interest rates, except the commercial banks saving rates, peaked during the third quarter of 2011. While overdraft rates and the weighted average commercial

banks loans and advance rates have tremendously gone down the others have remained relatively close the levels of the third quarter of 2011.

Figure 2: Trends in principal interest rates

The net foreign assets of the banking system increased from a revised figure of KSh 331.7 billion in June 2012 to KSh 352.0 billion in September 2012 while domestic credit increased by 4.5 per cent from KSh 1,550.5 billion in June 2012 to KSh 1,660.1 billion in September 2012. Consequently, extended broad money supply M3 increased from KSh 1,970.5 billion to KSh 2,060.6 billion over the same period. Stock market performance rallied strongly in September 2012, with gains in the Nairobi Stock Exchange 20 Share and Nairobi All Stock Index. The NSE 20 share index rose from 3,704 points in June to 3,972 points in September 2012. Trends in the NSE 20 share index up to the third quarter of 2012 are shown in Figure 3.

Figure 3: NSE 20 share Index

3.0 Balance of Payments

Summary of external sector statistics developments during the third quarter of 2012 are presented in Tables 3 and 4. Merchandise trade balance narrowed by 3.2 per cent to a trade deficit of KSh 218,277 million in the third quarter of 2012 from a deficit of KSh 225,529 million in the third quarter of 2011. This was due to slackening of the value of both total exports and imports compared to a similar period in 2011. The Kenya Shilling exchange rate to the US Dollar has remained fairly stable since January 2012 averaging at KSh 84. The sluggish performance of exports may be attributed to decline of horticulture exports. Imports bill amounted to KSh 346,889 million in the third quarter of 2012 while exports earnings were valued at KSh 128,612 million.

The current account deficit narrowed by 21.0 per cent to a deficit KSh 105,432 million in the third quarter of 2012 from a deficit of KSh 133,512 million recorded in similar period in 2011. However, the deficit widened compared to the second quarter of 2012 when it stood at KSh 63,302 million. The trade in goods deficit was due to high imports bill compared to total exports earnings. The expanded deficit in the income deficit was due to a rise in foreign earnings on investment in the Kenya, particularly earnings on long term loans. The income deficit widened to KSh 4,365 million in third quarter of 2012, up from a deficit of KSh 2,171 million in similar quarter in 2011.

Services account increased from a surplus of KSh 43,967 million in the third quarter of 2011 to record a surplus of KSh 64,972 million in the third quarter of 2012. Current transfers inflows increased to KSh 52,237 million in the third quarter of 2012 compared to KSh 50,220 million recorded in similar period in 2011. Diaspora remittances as measured by the Central Bank of Kenya recorded an increase of 6.6 per cent to KSh 23,519 million in the third quarter of 2012.

The financial account covers transactions which result in a change of ownership of financial assets and liabilities between Kenya residents and non-residents. The capital and financial account net inflows account amounted to a surplus of KSh 87,339 million in the third quarter of 2012 compared to surplus of KSh 107,096 million in corresponding period in 2011. Inward capital flows mainly occurred in the form long term loans and short term capital inflows. Gross official reserves increased from KSh 544,035 million in the third quarter of

2011 to KSh 615,229 million in the third quarter of 2012 indicating improved balance of payments position.
